

Fry measuring plate

Printing stringency: Low

Our condition

- Layer height: 0.1
- Infill: 20%
- Supports: No
- 210 °C, with PLA

Features

- To measure body length of newly hatched fry, coupled with coverslip, simple microscope/stereoscope, with camera.
- With 4 well-sets of different sizes: 5 mm, 7.5 mm, 10 mm, and 12.5 mm. Also measuring dots on the side which are 1mm apart from each other
- The length of the fry can thus be converted based on pixel numbers

v1.0: Bod Owens, 2022/10/16
